(54) Title: CONSTRUCTION MATERIALS (57) Abstract Construction materials suitable for use as, or in, a wearing course for children's play areas, games areas and like purposes, comprise an agglomerate of granules of a thermoplastic elastomer. The granules of the agglomerate are conveniently held together by means of a polyurethane or other binding agent or by being melded together. The thermoplastic elastomer is, for example, a block copolymer of the styrene type, for example a styrene-butadiene-styrene block copolymer. The granules of the thermoplastic elastomer are preferably angular granules or multi-facet granules. <div data-bbox="1096 1774 1421 1963" style="text-align: right;"><p>R. E.
